PowerPoint Lab

**Instructions**: Create a PowerPoint presentation containing at least 10 slides on the biography of Steve Jobs. Don’t just talk about the general more common information about him such as “He’s the CEO of Apple,” but instead try to find some uncommon interesting tidbits about him such as “He’s a vegetarian.”

The presentation will be graded on content, visual effects, coherent color, special effects, and animations, among others. It should be “professionally” looking.

You will use these slides to make a formal presentation in class lasting for 5 minutes. The more you deviate from the 5 minutes the lower your grade will be.

Refer to the “grading sheet” link for more information on the grading criteria.
