

Outside Reading Requirements

For Wil Clarke's Classes

Since knowledge is exploding at such a tremendous rate in our world of today, it is imperative that the educated person read from periodicals as well as from books. For this reason I require my students in this course to read at least six articles related to this subject from appropriate journals of recent date and locate at least two new websites with significant mathematical content applicable to your course. You can find my suggestions and other material at <http://www.lasierra.edu/~wclarke>.

General Rules:

- A report should be submitted the last class period of the week.
- No more than two reports per week will be accepted.
- No reports will be accepted during final exam week.

Journal Article General Rules:

- At least 4 should be from the supplied suggested list.
- No more than one article per issue of a journal, and no more than three articles from any one journal will be accepted.
- Recent date means within the last twelve months.
- Reports should be on 3" x 5" cards in the following format:

Author Name	Your Name
Title	Date Read
<u>Source (Include Journal Name, Full Date of Issue, Page Numbers Read)</u>	
Brief Summary of article	
Your personal evaluation of the article	

Website General Rules:

- Staple to the cover page printouts of several sample pages of the site.
- The cover page of the report should include:
 - i. Your name and the date of the report
 - ii. The URL
 - iii. A brief summary of the material on the site that you found helpful.
 - iv. Your opinion as to how academically trustworthy the site is.
